

Welcome

We are pleased you have chosen the Saint Joseph's Family Health Center for your medical needs.

Our center has received National Committee on Quality Assurance (NCQA) designation as a Level 3 Patient Centered Medical Home (PCMH). This is a special and desired award that not all medical practices receive.

In a Patient Centered Medical Home, you are cared for a team of health care experts led by your physician. We take care of all your health care needs by coordinating with outside facilities and specialists in order to provide complete medical care to you.

Our PCMH brochure explains how the Family health Center will benefit you and your family. It provides contact information, office resources and more information right at your fingertips. Be sure to keep it in a convenient place for future reference.

We are dedicated to offering you the very best health care possible. As part of this, we have a Patient Satisfaction Survey and hope you will offer feedback on your visit experience. You can also provide additional thoughts or ideas by submitting them via our *Suggestion Box* located in the Reception Area.

We are very excited to be one of the first Patient Centered Medical Homes in Yonkers. This has led to better access and higher levels of care for our patients. We look forward to serving you and caring for your health care needs.

If you have any questions about our practice and/or services, please be sure to ask your Provider during your visit, or call us anytime at (914) 375-3200.
